& ROTTERDAM SCHOOL OF MANAGEMENT

OCTOBER 23 & 24

AMSTERDAM

SUBMISSION DEADLINE:

15 MAY 2024

SUBMISSIONS@RESHAPINGWORK.NET

AI@Work

CALL FOR PAPERS

The collaboration between humans and AI at work is increasingly significant as AI technologies rapidly enter various sectors, transforming work environments. The introduction of Generative AI (GenAI) in late 2022 was a turning point, prompting organizations to innovate with GenAI for better value creation. This shift, highlighting both opportunities and challenges, extends beyond mere technology to the future of work, involving the use of AI in managing tasks and integrating AI tools into daily practices.

The AI at Work Reshaping Work Conference focuses on this crucial moment by bringing together scholars across disciplines to explore AI's impact on work and the adaptations needed for the future. By focusing on specific themes, the conference encourages a comprehensive discussion on AI's role in transforming work, aiming to foster understanding and guide the way forward through collaborative exploration, embracing AI's potential while addressing its challenges with insight and innovation.

Key Dates

May 15: Abstracts submission deadline

June 3: Authors informed of a decision, Early-bird tickets

July 16: Deadline to confirm presence at the event

October 23 & 24: Reshaping Work 2024 Conference in Amsterdam
