### Featured Live Stream Seminar

#### Organizational ESM Research: From Design and Analysis to Publication

July 19 - 20  
Begins 11am New York time

This seminar introduces the use of Experience Sampling Methods (intensive longitudinal methods, ecological momentary assessment, diary methods, ambulatory assessment) to examine organizational phenomena. Day 1 topics include development of designs and measures, challenges with publishing ESM studies in organizational journals, and an overview of tools used for data collection. Day 2 topics focus on issues of analysis, including basic within- and between-person descriptive statistics from a Multilevel SEM perspective. A final module introduces more advanced Dynamic SEM techniques.

**Daniel Beal**  
*Associate Professor and Chair of the Research Methods Division of the Academy of Management*  
Pamplin College of Business,  
Virginia Tech
