

Webinar Series

Response and Resilience in Supply Chains Amid COVID-19

This series of webinars traces the evolution of supply chains in turbulent and uncertain times experienced as a result of the COVID-19 pandemic. We hear what firms are doing to build more responsive and resilient supply chains to mitigate disruptions. The structure of the webinars will be in the form of panels comprising manufacturing, logistics and service companies, associations and academia.

In later webinars, we discuss the impact and outlook for specific industries and applications, for example, transportation, pharmaceutical and health care, tourism, ethical procurement and digital collaboration.

(All sessions will comprise 30 mins presentations and 30 mins Q&A Panel. They will be held at 9.00am, Australian Eastern standard time.)

Webinar Moderator: Norma Harrison, Professor of Management, Macquarie University
