

Management Consulting Learning Labs

Management Consulting Challenges in the Era of Covid

Throughout the upcoming academic year, the MC Division will be offering a series of learning labs – virtual synchronous assemblies during which experiments, observations, and practices in the field of management consulting can be shared among our members. The labs will address the needs and concerns of our members across three areas: consulting, teaching, and research.

Our first MC Learning Lab will feature consultants from big, mid-tier, and small consulting firms who will share the challenges they are facing in the era of Covid 19. They will discuss practices for managing these challenges, and importantly, suggest ideas for research to address these difficulties. For practicing consultants this is a perfect opportunity to improve your practice, and for scholars this is a great opening to explore ideas for research.

Join us on **Tuesday, September 28** from 12noon to 1pm EST.
